Consider the following desired outcomes to prepare students for tutoring.

- Preparing #4: Students have at least attempted the work.
- Preparing #5: Students know specifically what they need help with.
- Preparing #6: Students have a positive attitude about the subject and their capabilities.

**Think:** Take 2 minutes to think up a couple of ideas for creating a short spiel to say to your students to help prepare them for tutoring and/or “sell” tutoring services. Jot your ideas here:

**Pair:** Pair up with a neighbor and take 3 minutes to discuss your spiels. Fine tune your creations together and decide on one you like best.

**Share:** A few pairs will be called on to share their spiels. Hand in this form to the facilitators; results will be shared in a follow-up email.
